

New Project Meeting

Silica Carbide from Tyre Pyrolysis

Date :20th March 2019 from 12.00 to15.00

Venue: NH Collection Hotel du Grand Sablon, Brussels

ETRA with the support of **ENEA**, the Italian National Agency for New Technologies, Energy and Sustainable Economic Development (www.enea.it), is pleased to invite you to a Meeting with the Project Coordinator and Potential Partners of the **New Pyrolysis Project to obtain Silica Carbide that** will be held on **20th March 2019 at NH Sablon Hotel, Brussels** in the context of the **26th Annual ETRA Conference on Tyre Recycling**.

The Scope of the meeting is to introduce the Project Coordinator and present the project, describing the technical aspects, illustrating the market opportunities, and select potential Partners

From 2009-2013, ETRA was partner in the **TyGRe** Project which focused on the development of a technology to obtain high value SiC from a thermal treatment of char obtained from tyre pyrolysis. The project was technologically successful and we are now preparing a new project to develop and exploit this technology.

In attachment the Project Outline and form to register for this workshop. Prior Registration for the ETRA Conference is required. Once you have registered for the Conference, you may register for the Workshop.
